

H7

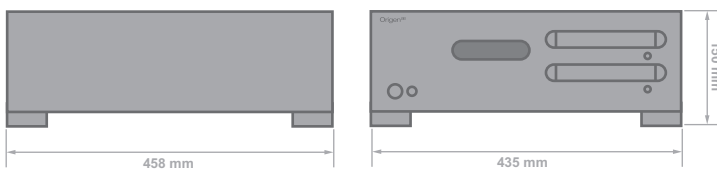

description

The Origen AE H7 chassis is the sister case of our elegant H5 HTPC case. The H7 has been crafted with the same accuracy and attention to detail that were put into the development of the H5.

The requirements for this case were clear from the start, we wanted a case that could accommodate the increased demands of home users and system builders so the H7 was created as the solution. The capability for two Optical Drives, two Disk Drives and a full ATX power supply it can deliver the power you require for your HTPC system.

Even with the increased capability of the H7 the same values of tremendous quality hold steady with the same finely machined side and front panels and supreme brushed anodised finish

features

- Optional VFD
- 8mm aluminium front face plate
- 60mm exhaust fan
- matched cd/dvd drive bezel
- blue illuminated power LED
- mce compatible VFD/IR module
- support for 2 hard drives
