

HM100

description

The OrigenAE HM100 is a hard drive mounting system that utilizes our unique rubberized screw isolation system allowing anyone to add an extra drive to their existing computer chassis.

Using high bond foam tape it can be fixed to any flat surface inside a computer chassis, and with its pre-drilled mounting holes can be easily secured to our S16V and S16T chassis.

features

- all aluminium construction
- rubberized screw isolation system
- fits any chassis
- pre-drilled holes for S16T & S16V
- high bond foam tape included

specification
