

# IR221

## description

The OrigenAE IR221 uses the new Philips developed Microsoft IR module for total Windows Vista Media Center functionality. This IR Module integrates seamlessly into the Microsoft Vista operating systems and connects via an internal USB cable. This module also supports the IR Blasting feature and includes the external IR transmitters.

## features

- IR transceiver fully dedicated for Microsoft Windows Vista
- fits S21T, S16T, S16V, S14V, S10V
- Incorporates Microsoft recommended RC6 IR protocol
- Resume from standby (S3,S4,S5 supported)
- Expandable for more devices via additional IR emitters
