

MM100

description

Origen^{ae} MM100 is the latest mini ITX case in the smallest size. Like all Origen enclosures, the construction is of the highest quality with full aluminum building and cooling engineering for optimal hardware performance. It keeps simple and stylish exterior. With quality Pico 120W power supply included, you can build powerful and stable your systems.

Our new IR100 receiver is without VFD display and installed automatically without driver and software under windows. It supports media center edition application and other media source. Like other S series, you can control your HTPC on/off by remote control from a long distance. As smallest multimedia device, you can make best use of your space at your office and home. MM100 can be your HTPC, CDP, Desk-FI, PC-FI for your enjoyable life.
