

X11 V2

description

Our engineers set out on a mission to develop an enclosure that was stylish enough to fit in the living room environment but could also take full size components to cater for the needs of power users and still have quiet operation. From this extensive research the X11 was born.

The X11 is the ultimate HTPC Builders dream, created with special density extruded aluminium side panels in order to contain as much noise as possible whilst still having a high level of thermal conductivity. Vibration isolating grommets are standard for every hard drive and a complex airflow cooling design to maximise airflow and cooling effects with minimum noise.

The X11s abilities for hardware housing and system cooling are unmatched in the HTPC marketplace case has been created to impress, perform and most importantly impress.

features

- Optional mce compatible VFD/IR module
- 8mm aluminium front face plate
- 2 x 80mm exhaust fan
- 1 x 80mm intake fan
- front usb, audio and firewire ports
- matched cd/dvd drive bezel
- blue illuminated power button
- vibration isolation grommets
- support for 4 hard drives

specification

external dimensions (WxHxD)	- 435 x 170* x 420mm (*inc feet)
construction materials	- all aluminium chassis
mainboard support	- atx, micro atx
psu support	- atx psu
pci / agp card support	- full size
drive bays	- 4 X 3.5" internal drive bays - 1 X 3.5" external drive bay - 1 X 5.25" external drive bay
fan support	- 2 X 80mm rear exhaust fans - 1 x 80mm intake fan
expansion slots	- 7
front I/O ports	- 2 X usb ports - 1 X firewire (1394) port - 1 X headphone - 1 X microphone
ir solution	- ir trans
net weight	- ~4.54kg
available colours	- black, silver
